## **C-5**

## Outstanding Performance and Lightweight design

C-5 is a split direct drive refrigeration unit specifically designed for the transportation of fresh and frozen products in medium to large delivery vehicles up to 30 m<sup>3</sup>. The aluminum chassis grants lowest unit's weight in the industry for maximum payload.

Sleek external design for superior vehicle appearance and extra-flat high capacity evaporator for maximum load volume.

Unsurpassed refrigeration capacity and air flow for maximum peace of mind in any working condition up to 55°C ambient temperature.

- ▶ Best performance in any ambient condition
- Superior air flow for optimal temperature homogeneity
- ▶ Temperature recovery You can rely on
- **▶** Unsurpassed reliability
- ▶ Aluminum lightweight chassis technology
- ▶ 90% of the unit's components are recyclable
- ▶ Environment friendly
- ▶ Very easy installation

## STANDARD EQUIPMENT

- HCFC R404a refrigerant
- Road Compressor: EFQP16, 164 cc, 6-cylinders
- Automatic+manual defrosting system
- Oil separator
- CPR valve
- Liquid Separator/Heat exchanger
- Quick installation hoses+fittings
- Microstat controller
- 12 or 24VDC version

## **OPTIONAL EQUIPMENT**

- 230-400/3/50-60 VAC standby operation (built-in)
- HGS3 Heat valve
- Multi-Temperature configuration
- Drain pan heaters
- Electric heater package
